KN95 FACEMASKS:

There has been much debate regarding whether the FDA was going to approve the KN95 for healthcare workers. This debate is still taking place, however per the Centers for Disease Control, these KN95 masks are one of numerous “suitable alternatives” to N95 masks “when supplies are short.” Specifically useful for those workers who aren’t necessarily in healthcare but still have some exposure during their line of work, such as housekeepers, janitorial staff, customer-facing retail workers, etc.

<https://www.cdc.gov/coronavirus/2019-ncov/hcp/respirators-strategy/crisis-alternate-strategies.html>

\$17.95 per pack

Pathos II 180 count packs: 12 packs per case
\$28.95 per pack

**EFFECTIVE AGAINST NOVEL
CORONAVIRUS (2019-nCoV)**

Effective against Coronavirus, PATHOS II DISINFECTANT WIPES are broad spectrum, general use quaternary disinfectant wipes for use on hard, non-porous surfaces. These wipes are used to effectively clean, disinfect and deodorize, hard, inanimate surfaces. PATHOS II DISINFECTANT WIPES formula is phenol-free, alcohol-free, bleach-free and non-staining. Rid surfaces of germs using PATHOS II DISINFECTANT WIPES from Share.

Features:

- Phenol-free, alcohol-free, bleach-free and non-staining disinfectant wipes.
- No need to rinse surfaces; just wipe and allow to dry.
- VOC compliant.
- EPA Registration Number: 6836-340-11547

Products on this page are in high demand. These products are manufactured in the US, therefore there are no back-orders. However there is an ordering queue, please contact us for the next available ship date.

VIRO-STAT RTU

Ready-To-Use Disinfectant Cleaner

Viro-Stat: RTU (ready to use) 1 qt spray bottle
\$11.50 ea. Cases of 12 (\$138 per case)

Viro-Stat: 1 gallon container \$255.00 per Case of 6 gallons

EFFECTIVE AGAINST NOVEL CORONAVIRUS (2019-nCoV)

VIRO-STAT RTU is a ready-to-use disinfectant effective against a broad spectrum of pathogenic organisms. EPA registered as a cleaner, fungicide, mildewstat, virucide and deodorizer, it is especially useful for general cleaning and disinfecting in nursing homes, hospitals, schools, veterinary clinics, and other institutions to help control the spread of infectious diseases as well as control odors in areas that are hard to keep smelling fresh. For a powerful, ready-to-use disinfectant that provides effective, one-step hard surface cleaning, deodorizing and disinfecting, use VIRO-STAT RTU.

FEATURES:

- Ready-to-use disinfectant, cleaner, bactericide, fungicide, mildewstat, virucide and deodorizer.
- Can be used to kill odor-causing bacteria and fungi during water damage restoration.
- VOC compliant.

SkinGuard24

All-Day Hand Sanitizer Gel

SkinGuard24: 2.4 oz bottle (should last one person approx 1 month)

\$12.50 ea. Packed in Cases of 12.

EFFECTIVE AGAINST NOVEL CORONAVIRUS (2019-nCoV)

SKINGUARD24 is a hand sanitizer and protectant. One spray lasts for an ENTIRE DAY! SKINGUARD24 forms a continuous layer or 'web' of microscopic spears on the surface of your skin, using the active ingredient known as Organosilane-Q". These spears kill germs, viruses, mold, yeast, spores and pathogens through a process known as "lyses". This is a mechanical process that literally punctures the germ cells like a pin on a balloon. The contacting cellular wall is broken or ruptured and the microbe is no longer able to control its internal hydrostatic pressure, resulting in implosion or explosion of the species, depending on its internal ambient pressure. No transfer of chemical or chemical residues occurs during this process. The Organosilane-Q film is not depleted and will continue to lyse cells. There is no increased pathogen resistance to Organosilane-Q on subsequent exposure and no increased mutagenicity.

FEATURES:

- One spray provides all day protection.
- Forms a layer of microscopic spears on skin.
- Kills many different types of organisms.
- Cells are destroyed mechanically, therefore no resistance is developed.

Products on this page are in high demand. These products are manufactured in the US, therefore there are no back-orders. However there is an ordering queue, please contact us for the next available ship date

PILLAGE

Disinfectant Tablets

Currently SOLD-OUT. Due back 5/18.

Call for pre-sale quote.

EFFECTIVE AGAINST NOVEL CORONAVIRUS (2019-nCoV)

Effective against Coronavirus, PILLAGE Disinfectant Tablets are bleach free and utilize an active ingredient called Sodium Troclosesene. Sodium troclosesene is much more stable than sodium hypochlorite (bleach), and releases chlorine at a much slower rate. This means that PILLAGE Disinfectant Tablets produce a solution that maintains disinfecting power for 7 days, in a sealed container and 24 hours in an open container, vs. bleach solutions that become inactive after a day. It takes just 2 tablets per quart and 8 tablets per gallon to make a powerful disinfectant solution. A single bottle of 120 tablets will yield 60 quarts or 15 gallons of finished solution!

FEATURES:

- Safe formula - it has a Neutral pH of around 6.0 which means it is much less aggressive on surfaces, including floor finishes, than traditional bleach products which regularly have a pH of 11+.
- Just 2 tablets makes a full quart of product. Just drop the tablets in a quart of fresh water and you're ready to go.
- Kills 99.9% of Viruses and bacteria.
- Once mixed, it works up to 7 days vs. bleach solutions that become inactive after just one day.
- PILLAGE Disinfectant Tablets ship Non-Hazardous.
- PILLAGE Disinfectant Tablets are more effective, at lower doses, than Quaternary Ammonium Compounds, bleach, hydrogen peroxide, and peracetic acids.
- Germs cannot build up a resistance to PILLAGE Disinfectant Tablets.
- PILLAGE is not deactivated by organic matter or cloth as other disinfectants can be.
- PILLAGE Tablets have a 3 year shelf-life. Less space – lasts longer

**MANY MORE DISINFECTANTS AND SANITIZERS AVAILABLE, FROM MANY MANUFACTURERS!
