

Towel Tracker introduces the SENTRY SLIM™ for resorts and hotels. Contact Towel Tracker to receive your choice of a free custom wrap OR free installation when you order Towel Tracker for your resort, up to an \$1,499 value!

Towel Tracker, LLC, is already serving multiple VRI resorts with unparalleled towel service. We have developed a patented, RFID-based turnkey solution for resorts to monitor, track and distribute towels to their guests. Guests use their room card to access the Towel Tracker SENTRY™ and take as many towels as they need, then bring them back to the machine when they're finished. Towels are assigned to each guest's room account like a library book, so resorts can track towel usage to each guest.

Towel Tracker has convenient options for any size resort, from the full-size SENTRY™ model with separate clean and return sides, or the space-conscious SENTRY SLIM™ model pictured above. Whatever your towel usage, whatever your property size, Towel Tracker, LLC can help reduce towel theft, keep pool areas clean, optimize pool staff hours and even reduce laundering costs.

Towel Tracker is extending a special offer to VRI affiliates: contact us today to receive a personalized savings analysis for your hotel or resort and choose between a free custom wrap or free installation when you purchase. Contact us today!
